christopher.vo.h@gmail.com · <https://www.linkedin.com/in/christophervoh/>

Software Developer with an aggressive problem-solving attitude with a keen ability to learn quickly. At present position as a developer, and previously as an intern, has been exposed to all the facets of a large-scale commercial Ruby on Rails and React web application. Contributed features and debugged a great variety of functionality throughout the stack. Enjoyed extensive coursework in creating, improving, optimizing, and troubleshooting software.

TECHNICAL SKILLS

- Frontend: JavaScript ES6, React, jQuery, Jest, Enzyme, Knockout.js, HTML5, CSS3, LESS, Bootstrap
- Backend: Ruby on Rails, RSpec, Node.js, MongoDB, MySQL, PostgreSQL, Mocha, Chai, Jasmine, Cypress, RESTful APIs, JSON
- Tools: Git, GitHub, Slack, Jira, Trello, Agile methodology, Google Optimize, Confluence, CircleCI, TravisCI, AWS S3, Docker

EXPERIENCE

OCTOBER 2019 – JUNE 2020

SOFTWARE ENGINEER, BEAM DENTAL

- Deployed a new platform using React that sells Beam Insurance for internal users, increasing annual revenue by \$250,000
- Advanced new internal claims dashboard reducing claims processing time from hours to seconds using Ruby on Rails and testing framework RSpec
- Launched a new program for users to opt in or out of Perks reducing business manufacturing by 62% using React and Cypress
- Collaborated with Product Owners, Engineering Managers, and UI/UX designers to plan and develop features on an application with agile methodology such as stand up, retros (including leading), team sizing of cards and three amigos
- Utilized GitHub and Git repository to store code globally and optimized CircleCI before pushing to production

FEBRUARY 2018 – AUGUST 2019

FRONTEND DEVELOPER, WIRED CAMPAIGNS

- Created technology standards and guidelines designed to foster maintainable coding practices and system design while ensuring these standards are implemented across all consultants
- Conducted code reviews and any other inspections necessary to ensure projects meet established standards
- Developed widgets based on client prerequisites to optimize user and consumer efficiency
- Improved client reach through updating SEO and creating interactive web-based marketing campaigns

EDUCATION

THINKFUL CODING BOOTCAMP COMPLETED SEPTEMBER 2019
